Corporation's Transmission Division in Galesburg, Michigan, with Mr. McReynolds. At this meeting I recall discussing ideas for various types of electronically assisted, lever shifted transmissions. In reviewing the materials contained in the August 11, 1993 fax, and my recollection of this meeting, I am of the opinion that Mr. McReynolds' suggestions, ideas and recommendations made at the meeting were such that Mr. McReynolds should be named as a joint inventor of the subject application.

I reviewed and understood the present application including the specification and claims prior to filing the application. I also reviewed the Declaration prior to filing. However, the error without deceptive intent of failing to name Mr. McReynolds as a co-inventor occurred because, at the time of reviewing the subject application prior to filing in June 1996, I failed to recall, recognize and appreciate Mr. McReynolds' 1993 contribution to the invention of the subject application.

Until discussions with my attorney, Mr. Gordon, I, without deceptive intent, had not recalled or appreciated Mr. McReynolds' contribution to the claimed invention and, thus, at the time of filing of the subject application, without any deceptive intent, had not included Mr. McReynolds as a co-inventor.

I hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful statements and the like so made are punishable by fine or imprisonment or both under 18 USC

§1001, and may jeopardize the validity of the application or any
patent issuing thereon.
